

Instructions and Product Information

Don't Become a Victim

Every so often we received inquiries from our customers regarding inconsistency in product performance. Those baffled customers, as usual turned out to be victims of counterfeiting, they inadvertently bought the fake Caboki from various online marketplaces.

Whenever a good brand is in demand, counterfeiters spring into action, ready to scam consumers like you. Counterfeiters sure can replicate our logo and package, but not our product performance and product safety.

How to Avoid Being Scammed

1. Verify authenticity: Each and every genuine Caboki comes with its own unique code that allows you to verify its authenticity at Caboki.com.

If what you've purchased does not have an Authenticity Verification code, it is fake!

Even if it comes with a code, you still must go to our site to verify, because the code could be fake!

Follow instructions at the back of each Caboki box to verify its authenticity.

2. Purchase from Official sites:

caboki.com (US), caboki.ca (Canada), caboki.co.uk (UK), caboki.net.au (Australia), caboki.hk (HK), caboki.tw (Taiwan), caboki.cn (China), caboki.fr (France), caboki.it (Italy), caboki.es (Spain).

Instructions

For best results, apply Caboki on clean and completely dry hair. Make sure your hands are completely dry. Don't use hair spray, gel or mousse before application.

Use a comb or your fingers to expose thinning area as much as possible by styling hair away from the area.

Take a "Before" picture with a camera or cell phone, so that you can compare it with the "After" later.

Hold the bottle 1 inch above the thinning area at a 45 degree angle. You can adjust the tilt to increase or decrease the amount coming out of the bottle.

Gently shake or tap the bottle with your fingers to dispense Caboki onto the thinning area. SLOWLY build up to a natural coverage by repeating the application a few times until desired result.

Pat your hair very gently with your palm in between applications to disperse the Caboki. You may also use a comb to gently style the applied area (Don't let the comb teeth touch scalp, just the hair only).

Crown area: With a wall mirror behind you, hold up a handheld mirror in the front to see your crown area in the wall mirror. Or you may face the wall mirror and hold up a handheld mirror close to the crown area.

Frontal area: place your hand under the hairline to keep it from getting onto your face.

Last step, protect your style with hair spray. Don't hold the bottle too close to your hair; 1 foot (30 cm) away from your head is recommended.

Now take a "After" picture and compare it with the "Before".

Removal:

Any shampoo will remove Caboki. If Caboki gets on your hands, just wash with water. If stray Caboki falls on your clothes, just dust it off, it will not leave any stain.

Tips:

If your hair is thinning uniformly through out a large area, create a part using a comb, and apply the Caboki along the part line. Create another part nearby and repeat until all area are covered with Caboki.

Take Before and After pictures so that you can compare and improve the application.

First few uses may seem time-consuming. Once you get the hang of it, you will be able to get it done within minutes! Caboki gives such a boost to self-confidence, our customers fall in love with it once they learn how to apply Caboki, often after just a few uses. You will to!

Common Questions

1. Will Caboki do any harm to my hair or scalp?

No. Genuine Caboki is made of a special kind of cotton fibers and mineral colorants, just like the fabrics of your clothes.

2. Can I use topical treatments along with Caboki?

Yes. Apply topical treatments first, let them dry. And then use Caboki.

3. Color does not match my hair

Here are a few tips to pick the right color: Stand in front of a mirror, check the hair ROOT color in the thinning area. This is the color to match.

If you have salt & pepper or highlighted hair, match the darker ROOT color. For example, if your native hair color is dark brown with some grey hair or highlighted hair mixed in, choose our Dark Brown.

If your color does not match any of our shades, get 2 colors that are closest to your hair and apply both.

4. Will Caboki stain my clothes or pillow?

No. Genuine Caboki will never stain any object, this is

the best advantage of Caboki. Simply dust it off or use a vacuum.

Common Mistakes by Beginners

Mistake 1: Haste

If you are new to Caboki, GO SLOW

Mistake 2: Hair looks "dusty"

Don't put on too much product and remember to disperse Caboki by gently patting the applied area.

Mistake 3: Hair too short or too thin

Your hair must be at least half inch long for Caboki to be effective. If your hair is very thin, the trick is to apply LESS product. Do not use on completely bald area.

Mistake 4: Rolling On Scalp

Do not imitate the professionals in the demo videos. (Actually the bottle only slightly touches hair, not scalp!). It takes a lot of practices to become a pro. As a first-time user, you must closely follow the instructions given here. If you initially find it a challenge, don't worry; just like learning to drive, the more you do it, the better you get.

Ingredients

Gossypium Herbaceum (Levant cotton) fiber, mineral colorants (Iron oxide).

Warnings

For external use only. Keep out of reach of children. If in contact with eyes, just wash out with water.
